Support Neurodiverse Differences

Change the Low Literacy Narrative

Literacy has the power to unlock our world. It is one of the base mechanisms by which we work, learn and communicate. But some individuals with neurodiverse differences struggle with the written word, and supporting these unique challenges is part of creating a more neuro-inclusive future for us all and changing the narrative for those with low literacy.

“

“The University of Law (ULaw) has around 10,000 students, of whom approximately 11% are disabled. With students spread across a number of campuses throughout England, and an ever-increasing number of students with complex needs, finding the right solutions presents a major challenge. Following a successful trial with Reader 2™ ULaw will be offering these to students who have a recommendation for readers. We are using them as part of a package of support with other solutions and other assistive technology to provide additional support and build confidence.” - Keith Houghton, Head of Support Services, University of Law

”

“

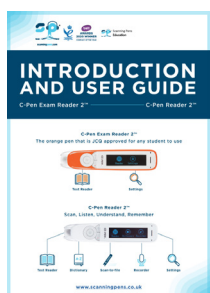

“It is a reliable tool for people who have reading problems. It is very handy, in a small size that easy to carry it around. It has multi-languages, which is good having it when travelling.” - Graham Rice, University of Westminster

”

“Give everybody the Reader 2™ because I can’t see how it wouldn’t help anybody. My friend who wanted it doesn’t even have dyslexia and she even said it would help her. So, if you definitely struggle with words, I don’t see any way it wouldn’t help you.” - Student, University of Plymouth

Implementation Guide: A Resource for Dyslexia in the Classroom

Effective reading instruction is the first and best way to improve reading when students struggle. We understand the dedication of educators who teach literacy lessons every day, so we have created a resource designed to aid educators in the implementation of our devices.

The C-Pen Reader 2™ is a reading support tool that puts independence at the heart of the user experience. Built-in dictionary support and AI-based text-to-speech feedback fosters confidence and nurtures reading skills, meaning that users can problem-solve their own reading hurdles and preserve valuable educator time.

What the C-Pen Reader 2™ can do for you...

Higher speed reading for improved productivity

Save text to file in reader mode

Audio boost for better hearing

Dictionary definitions to support pronunciation and understanding

Easily accessible word definitions

Improved voice recording quality - louder and clearer
